

Paternity (Genetic Testing)
Coordinator:

Goal: To provide the court the genetic test results.

1. An appointment for the mother, alleged father, the child/ren of interest and the lab technician will be coordinated and conducted at the Domestic Relations Office
2. The lab technician will collect samples of tissue by swabbing the inside cheek of each participant and will seal the tissue samples in sterile containers.
3. The tissue samples are taken to the lab for testing.
4. Results will be provided to the DRO by the lab and a Report to the Court will be filed District Clerk's Office.
